

### Features

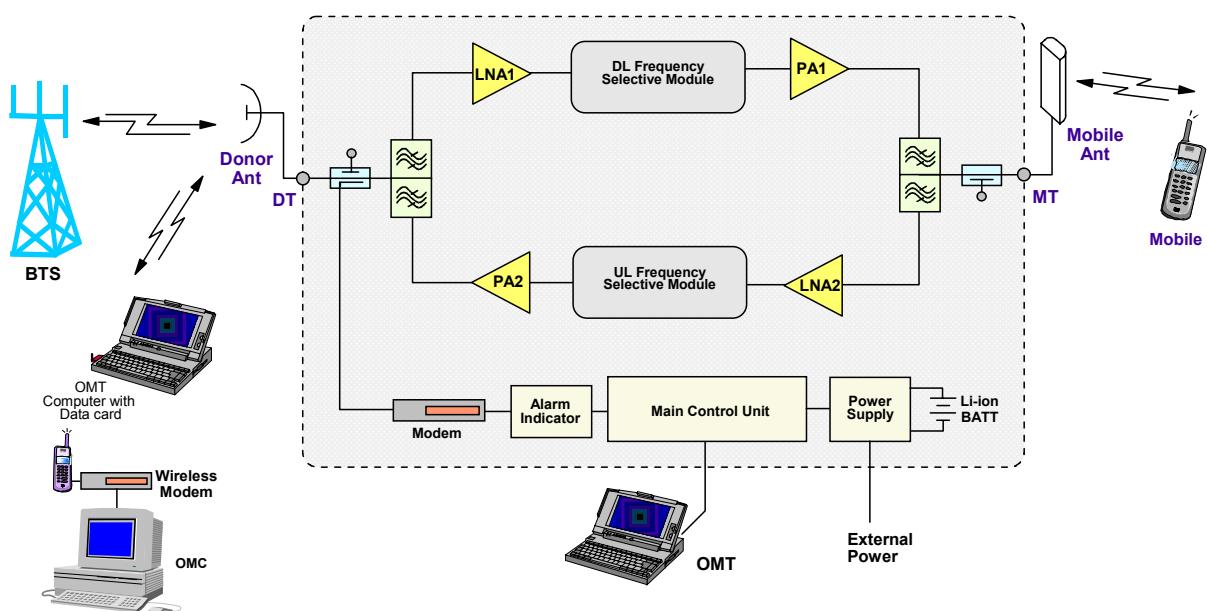

- Operating at fixed 10MHz bandwidth
- Integrated wireless modem for remote configuration, monitoring and control.
- Internal backup battery keeps the alarm unit running for up to three hours after power failure.
- Optional OMC is available for remote operation and maintenance of a group of repeaters.
- Designed for all weather outdoor installation – waterproof, damp-proof and omni-sealed (IP65).

### Product Description

The RD-1900 band-selective repeater is designed for outdoor and indoor operation in the CDMA1900 system. Band-specific linear amplifier and filter effectively amplifies the desired BTS carrier and provides superior out-of-band rejection. Typical units incorporate up to 10MHz bandwidth with frequencies programmed to specific requirements of the network. Remote configuration and surveillance is possible through Comba's remote control and monitoring system, via laptop or wireless modem to the OMC. Internal Li-ion backup battery built in enclosure ensures alarm signals are sent out while power is down. The RD-1900 comes in a completely sealed, well-ventilated cast aluminum enclosure, suitable for all weather conditions.

## Operation and Maintenance

Using a direct serial connection to a PC, installation and commissioning of the RD-1900 is accomplished by the OMT. Using the integrated wireless modem (data or SMS), the equipment parameters can be monitored and controlled remotely.

Controlled equipment parameters include: RF Switch, ATT, Over-Temp Threshold, DL Output Power Low Threshold, DL Input Power Overload Threshold and Alarm Report Enable.

Monitored equipment parameters include: Alarms (LNA, PA, PLL unlock, Power Down, PSU Fault, Chassis Lock, Self-Oscillation, DL Input Power Overload, Over Temp, VSWR, DL Output Power Low), DL Output Power and DL Input Power.

The RD-1900 has been developed to take advantage of advanced network operation, where the OMC (optional) provides an effective solution for central monitoring of a group of Comba products.
